Introduction to AI

Dive into the world of AI and discover what it has to offer

Course Overview

This course is centered on the foundational concepts, techniques, and implications of Artificial Intelligence (AI). It provides a comprehensive overview of how intelligent systems are developed, deployed, and governed.

While AI encompasses a wide range of technologies and use cases, at its core are fundamental principles from computer science, data analysis, and human cognition.

Course Topics

There are four major domains covered in this course:

- Foundations and History of AI
- AI Technologies and Techniques
- Security and Ethics in AI
- Applications and Impacts of AI

Course Details

Live Online

This course is taught with UMass Global's LIVE ONLINE training platform using video communications software.

Course Schedule

Weekdays: **Tuesday & Thursday**

Dates: **February 17th – March 19th**

Time

7:30 PM – 10:30 PM (PST)

REGISTRATION INQUIRY FORM

Fill out this short form or scan the QR code and we will be in touch with you shortly.
